Challenge: Hobbies on User Detail Page

1. You only have to work on the ***views/user/show.blade.php***.
   Copy the whole <ul.. > - Block from the **views/hobby /index.blade.php**
   and make some adaptations:

2. Change in the outer **@foreach loop** the variable **$hobbies into $user->hobbies**.

3. **Delete** the Edit-Link and the Deletion-Form.
   Also delete the whole span "Posted by"

4. Around the whole <ul> put an **@if … @else .. @endif** , to take care of the case that
   this user has not created any hobbies yet.
   For this @if you can use: **$user->hobbies->count()**

   In the @else part put a paragraph saying:
   "NAME has not created any hobbies yet."
   Use the dynamic user´s name

5. Above the <ul> put a headline saying: <h5>Hobbies of NAME</h5>
   Add some margins, so it looks good.
   Apply a font-size of 150% to the card header.
